TROY Exclusive Security Features

3-Position Printer Key Locks and Paper Tray Locks

Most businesses locate their workgroup printer in an open office environment. This creates a security risk. TROY offers MICR locks and paper tray locks to reduce the risk of cheque stock theft and printer misuse.

Standard on TROY MICR 9050 Secure Ex.
Tray locks optional on other MICR 9050 printers.

Exclusive TROYmark™ Intelligent Anti-tampering Technology

TROYmark™ is a watermark of user-defined variable data, printed diagonally across each cheque. It provides state-of-the-art deterrence of fraudulent cheque alteration.

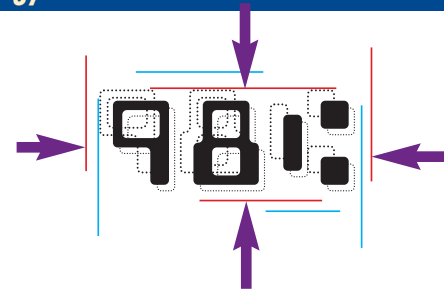

Standard on TROY MICR 9050 Secure Ex.

ExPT™ Exact Positioning Technology

A MICR line out of alignment is one cause of rejected cheques, a multi-million dollar problem for banks and companies. ExPT™ allows users to precisely adjust the MICR line without affecting the data file.

Available on all TROY MICR 9050 series printers.

Built-in Secure Encryption and Decryption

Data security is critical in a distributed printing application. TROY's encryption/decryption technology "unlocks" and prints the data only when it is received at the TROY printer.

Available on TROY MICR 9050 Secure and Secure Ex printers.
